DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to a coffee plant or cell that produces galacto-mannans modified to reduce endogenous levels of α -D-glucosidase activity, said cell containing RNA anti-sense to mRNA derived from α -D-glucosidase gene, or RNA capable of forming dimers under physiological conditions, wherein the RNA is under the control of a constitutive or inducible *cps1* coffee promoter, coffee beans obtainable from said coffee plant, classified in class 435, subclass 419, for example.
- II. Claims 8-11, drawn to a method of increasing the solubility of coffee in a coffee beverage, classified in class 426, subclass 594, for example.

The inventions are distinct each from the other because:

Inventions I and II are related as product and process of using. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process (MPEP § 806.05(h)). In the instant case, the coffee plant or cell can be used to develop other cultivars of coffee plants.

Art Unit: 1638

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
